PROPERTY:

NOVACRIL 34 Is a special acrylic resin retanning has short chain, which gives the leather good firmness, while maintaining a certain softness.

So can be used on items from footwear, leather goods, upholstery which gives the above characteristics, while maintaining a low specific weight.

NOVACRIL 34 Used in the neutralization bath is obtained of the skins very compact over the entire Surface, after neutralization used in the bath retanning effect gets more rounded and snappy, used after the fatliquor you get a firm grain.

NOVACRIL 34 By excellent results of uniformity of the dye, very visible in the head, on the wrinkles, which can mask the lower grain, helps the penetration of dyes and retanning, and can be used to waterproof articles as it is completely free from sodium salts.

NOVACRIL 34 It can be used for the production of pastel colors and whites, as it has a good resistance to light. For best results it is recommended to dry the skin to dry-vacuum.

These notes year only information and does not imply any responsibility on the part of the company NOVAKEM SRL, it is the responsibility of the customer to determine the suitability of the product applied to its special processing.
