

NOVADECAL LLD

DECALCIFYING AGENT

PHYSICAL AND CHEMICAL PROPERTIES:

Appearance		DUST
Odour		CHARACTERISTIC
Colour		SLIGHTLY YELLOWISH WHITE
Solubility		SOLUBLE
Ph		2,0 – 3,0
Charge		ANIONIC
Active matter	%	100%
Use		BEAMHOUSE DECALCIFYING AGENT

PROPERTY:

NOVADECAL LLD is used in the skins to remove calcium salts present after the lime-yard phase.

NOVADECAL LLD Is a mixture of buffered organic salts and acids, formulated to complex calcium ions so as to have a complete action without being aggressive.

When the decalcifications is over, the treated skin presents without demaging swelling and a final Ph of 8,5.

NOVADECAL LLD Contributes to the cleaning of the skin with a whitening effect, helping the release of the detached bulbs and the salts that have formed at the heart of it and which have not yet emerged.

These notes are only for information and does not imply any responsibility on the part of the company NOVAKEM SRL, it is the responsibility of the customer to determine the suitability of the product applied to its special processing.
