

NOVALIKER LS81

LECITHIN FLUID-BASED FATTENING FOR VERY SOFT ARTICLES

PHYSICAL AND CHEMICAL PROPERTIES:

Appearance (20°C)		VISCOUS BROWN LIQUID / YELLOWISH AND SLIGHTLY CLEAR
Recommended uses		Retanning (as a pre-fattening product) Fattening The product can be used for white tanning and solid-light articles.
Chemical character		Natural emulsifying phospholipids
Ph (sol. 10%)		6,0 – 7,5
Active matter	%	Ca. 90%
How to use		Mix before use
Application advice		Car upholstery, leather goods, quantery clothing, upper and furnishings
Stability at warehousing		At least 2 years in the original sealed packaging at temperatures between 0°C and 50°C. In the future sediments can be formed. It is not know because it is due to insoluble sugars from the lecithin used. This sediment emulsifies like the rest of the material and will have no adverse effect on the results of the application.
