

# NOVAPOLISH GT

## DEGREASING BASE FOR FELT

### PHYSICAL AND CHEMICAL PROPERTIES:

Appearance		COLORLESS LIQUID
Odour		SCENT OF LAVANDER
Ph (in solution at 10%)		10
Solubility		EASILY SOLUBRE
Use		CLEANING FELT AND PRESSES

### PROPERTY:

**NOVAPOLISH GT** Is added to sodium Hypochlorite in the range of 10 -20% as needed. It becomes a creamy, transparent and fragrant product ready to be used for its degreasing and decolorant action, penetrates deeply while respecting and adapting over time the fundamental operational features of felt, such as the absorption of water from pressed leather and the subsequent rinsing of the same conveyed through the special discharge.

### HOW TO USE THE PRODUCT :

The mixture of **NOVAPOLISH GT**

and sodium hypochlorite is used when the setting machine need for washing and needs to be pressed for other colored dye skins, for example when the felt is browned and other leather must be pressed beige or color.

Yje obtained mixture should be diluted 3:1 (3Kg of product and 1Kg of water at the temperature of 35°C). Then apply the solution on the felt without pressing the machine and finally rinse it thoroughly with water.
