

NOVALIKER G 80

SULPHITED NATURAL OILS

PHYSICAL AND CHEMICAL PROPERTIES:

Physical state		CLEAR LIQUID
Colour		YELLOW
Applications		chrome retanning; prestuffing; stuffing; neutralisation
pH		6.5 – 7.5
Dry residue	%	75.0 ± 1.0
Storage		At least two years in the original sealed packaging at temperatures between 5°C and 40°C. NOVALIKER G 80 may become cloudy at low temperatures. In that case, the product must be heated to a temperature of between 15°C and 25°C and the contents of the drum or IBC container carefully mixed.

PROPERTY:

NOVALIKER G 80 is a natural multifunction stuffing agent recommended for all articles, from extremely soft clothing to firm footwear.

NOVALIKER G 80 distributes evenly over all parts of the skin, giving the whole surface a very uniform feel. It effectively reduces the stiffness of hard leather.

NOVALIKER G 80 improves the fullness and roundness of split leather and can be used as the main stuffing agent on skins for uppers.

NOVALIKER G 80 can be added in retanning with or without chrome, neutralisation and stuffing. Furthermore, it can be used for white tanned, light-fast articles.
