

# RETICOLANTE AA 4010

## CROSS-LINKING FOR ACRYLIC AND POLYURETHANE POLYMERS

### PHYSICAL AND CHEMICAL PROPERTIES:

Appearance		STRAW-COLORED LIQUID
Viscosity at 25°C		50 – 800 MPA.S
Density at 25°C		1,065 – 1,075
Water Solubility		DISPERSIBLE
Dry Residue	%	99% MINIMUM
Residual Monomer		LOWER THAN 100 PPM

### PROPERTY:

**RETICOLANTE AA 4010** The product is used as cross-linker when high strength is required. Its low viscosity guarantees a good and immediate dispersion of the product into the solution for use. Due to the low residual monomer the product is less irritating than other similar products. The recommended dosage is between 1 and 3% related to the polymer.

**RETICOLANTE AA 4010** Protect the product from freezing, must be stored from +5°C to +35°C.

These notes are only for information and does not imply any responsibility on the part of the company NOVAKEM SRL, it is the responsibility of the customer to determine the suitability of the product applied to its special processing.
